Alkali Makes Soap Bad for Washing Hair

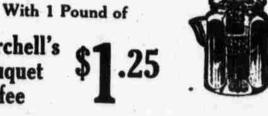

Most soaps and prepared shampoor contain too much alkali, which is very njurious, as it dries the scalp and nakes the hair brittle.

The best thing to use is just plain mulsified cocoanut oil, for this is pure and entirely greaseless. It's very cheap, and beats the most expensive soaps or anything else all to pieces. You can get this at any drug store and a few ounces will last the whole family for months.
